**OF CONNECTION**

Company profile

WHAT

## EK Group turns change into opportunity.

We create connections that integrate people, ideas, and technology, driven by the energy of innovation and the flexibility needed to anticipate the demands of an ever-evolving market.

Through our **three divisions** — EK Global, EK Factory and EK Connect — we are the partner that **guides you toward the future.**

Thanks to our direct control over the entire supply chain, from copper rod to finished product, we ensure quality, reliability and traceability at every stage of the process. We offer complete solutions, including finished products that are connectorized and fully assembled, designed to precisely meet the requirements of every application.

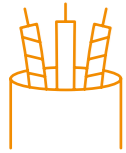

## Our goal is to transform technology into a bridge that connects people, continents, and visions.

We continuously evolve to efficiently meet market needs, delivering reliable solutions that become trusted partners for your projects.

EK Group creates synergies to ensure **smart and secure solutions.**

WHO

## Three strengths, one shared power.

### Product innovation

We develop high-performance special cables, wiring systems, and electrical panels, delivering tailor-made solutions for modern industry.

### Total customization

We adapt every stage of the process to your needs: from design to the selection of materials, cross-sections, and specific manufacturing processes to bring your project to life.

### Integration and synergy

We merge our divisions (manufacturing, distribution, and wiring) to provide you with a complete and competitive service.

# WHY

## A story of transformation

Founded as a distributor of electrical cables, we have evolved into a **fully integrated industrial group**, combining manufacturing, distribution, and the development of customized solutions.

Every product in our range, from special cables to connectors, is born from **research and advanced technology**, showcasing our ability to turn experience into sustainable innovation.

# HOW

Always close to you,  
wherever you are in the world.

## Mission

**Innovators by nature**, we create solutions that combine customization with reliability and effectiveness to create valuable connections. Riding the wave of technological change, we provide the **guaranteed excellence** demanded by the industrial sectors we support.

## Vision

We strive to be the hub of a **global network of trust**, where every connection transmits energy. Reliability **is the engine** that drives our presence in the market and dynamism guides our continuous evolution.

## 2001 The origins

**Elettrotek Kabel S.p.A. is founded** as a specialized distributor. CEO Roberto Gallingani lays the foundations for building an integrated supply chain, with the goal of offering customers a complete and efficient service.

## 2011 International expansion

The Group enters the North American market with the opening of **Elettrotek Kabel North America in Parsippany**, New Jersey. A structured network of partnerships is established across Europe, the Middle East, and North America.

## 2017 From distribution to production

With the **acquisition of SDB Special Cables** in Vicenza, EK Group launches the in-house design and production of special cables, integrating over thirty years of technical know-how.

## 2021 New horizons

The Group expands through two strategic acquisitions: **Elettrotek Kabel Canada** in Ontario, Canada, and **MB Technology** in Italy. The latter brings expertise in the development of complete cable-connector systems for highly specialized industries.

## 2023 Consolidation in the marine and offshore sector

The acquisition of **CCI Cable Service** in Ferentino (FR, Rome) strengthens the Group's presence in the marine, offshore, and oil & gas markets, leveraging over 40 years of experience from the acquired company.

## 2024 Toward industrial automation

EK Group integrates **ATB Cablaggi** of Pieve Vergonte (VB), a company specialized in electrical and electronic wiring and control panels for industrial automation

## 2025 New divisions

EK Group reorganizes into three strategic divisions: **EK Global** for distribution, **EK Factory** for manufacturing, and **EK Connect** for integrated solutions. **Romana Elettrotecnica**, acquired in the same year, MB Technology, and ATB Cablaggi become part of EK Connect, while **C.E.Fi.S.** strengthens the national distribution network.

# TIMELINE

## Three divisions, one connected ecosystem

Through **EK Global**, **EK Factory**, and **EK Connect**, we transform every stage of the process—**from vision to finished product**—into a seamless and comprehensive experience.

### **EK GLOBAL**

#### **Where it all begins: connection**

We are the first point of contact—the team of specialists that supports customers and partners in identifying the most suitable solution.

With four strategic logistics hubs—**Elettrotek Kabel Europe**, **Elettrotek Kabel North America**, **Elettrotek Kabel Canada**, and **C.E.Fi.S.**—we ensure extensive storage and worldwide distribution.

**Our approach:** we analyze your project, define the requirements, propose the solution, and deliver full certification. Global-scale efficiency, with the tailored attention of a trusted partner.

## **EK FACTORY**

### **Where ideas take shape: manufacturing**

Here, vision and technical expertise come together to create precise and reliable systems.

Our two production plants—**SDB Special Cables** and **CCI Cable Service**—share the same mission: innovation, quality, and reliability for LV, MV, and VFD cables, designed for diverse industries, all upheld to the same standard of excellence.

## **EK CONNECT**

### **Where energy sparks: integration**

With **MB Technology**, **ATB Cablaggi**, and **Romana Elettrotecnica**, we bring together complementary expertise and experience to create wiring systems, electrical panels, and industrial automation solutions.

Modern facilities, advanced technologies, and specialized teams allow us to deliver customized solutions across industries: automotive, energy, manufacturing, and civil and industrial installations. From concept to project, from cable to complete system—**EK Connect** closes the circle.

## **Numbers that reflect our ambition**

**42.000 mq  
(452,084 ft<sup>2</sup>)**

Production area

**17.500 mq  
(188,368 ft<sup>2</sup>)**

Warehouse space

**12**

Brands

**BEYOND THE NUMBERS**

## Marine

Solutions built to withstand the harshest conditions, ensuring reliability at sea and in the most demanding environments.

**GAALSHIP®**  
**GAALNAVY®**

## Mining & Tunneling

High-performance cables and connectors engineered for underground environments: delivering maximum electrical and mechanical stability even in the presence of moisture, dust, impacts, and extreme temperatures.

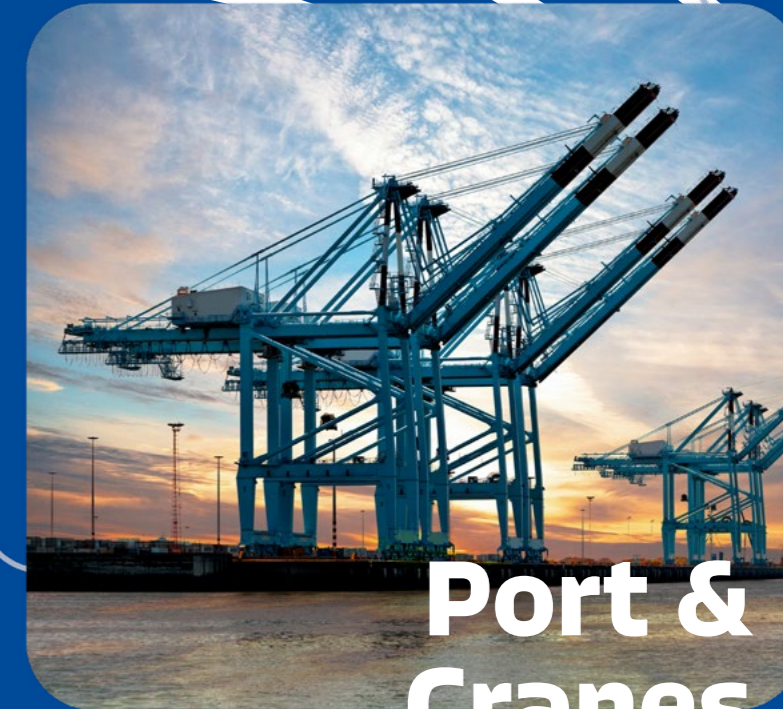

**FLEXIMINING®**

## Automation

Smart cables and systems for Industry 4.0: from control to data transmission, certified solutions that ensure continuity and high performance in dynamic environments.

**GAALFLEX®**

## Port & Cranes

High-performance cables and connection systems for port cranes, material handling equipment, and container operations: offering mechanical robustness, resistance to saltwater and weather, and guaranteed operational continuity.

**FLEXIDRUM®**  
**FLEXIFESTOON®**

# MARKETS

**From energy to connection:  
powering progress worldwide**

## Industrial

Cables and wiring built for manufacturing and heavy industries, engineered to endure extreme heat, vibrations, dust, and chemicals in nonstop production environments.

**GAAL THERM**<sup>®</sup>  
**GAAL FIBER**<sup>®</sup>

## Network & Security

Secure and high-performance network infrastructures: from structured cabling to video surveillance and access control systems, providing reliable signal stability and data protection.

**GAAL NET**<sup>®</sup>

## Offshore

From Oil & Gas platforms, through FPSOs to offshore Wind Farms. Certified cables engineered for the harshest marine conditions. Resistant to saltwater, pressure, vibrations, and extreme temperatures, they ensure uninterrupted energy supply for all offshore sector applications.

**Firebar**<sup>®</sup> - **CCI**<sup>®</sup>

# MARKETS

**From energy to connection:  
powering progress worldwide**

## Quality

### Every connection counts

**EK Group** implements an integrated management system compliant with the **highest quality and safety standards**. Every stage of the production cycle—from cable design to the manufacturing of wiring systems and electrical panels—is subject to internal testing and compliance checks.

Our laboratories carry out **electrical, mechanical, thermal, and environmental resistance tests** to ensure consistent performance even in the most demanding operational conditions.

## Certifications

### System certifications

**ISO 9001**

Quality Management System

**ISO 14001**

Environmental Management System

**ISO 45001**

Occupational Health & Safety Management System

QUALITY AND CERTIFICATIONS

## Certifications

### Product certifications

(according to each sector and application)

**CPR**

Construction Product Regulation (EU)

**UL**

Underwriters Laboratories Inc. (USA)

**CSA**

Canadian Standards Association (CA)

**ABS**

(American Bureau of Shipping – USA)

**DNV**

(Det Norske Veritas – NO)

**Lloyd's Register**

(LR – UK)

**RINA / RINAMIL**

(Registro Italiano Navale – IT)

**BV**

(Bureau Veritas – FR)

Compliance with

**ROHS** and **REACH**

# Sustainability

Building the future responsibly

**EK Group** conducts its business with social responsibility, maintaining a constant focus on reducing environmental impact. We integrate sustainability into our development plans, taking people, processes, and the environment into account in every decision.

## Our actions are guided by four pillars:

### Environmental sustainability

Efficient resource management and eco-conscious production to minimize environmental impact.

### Social responsibility

Training, professional growth, and meaningful engagement with the communities where we operate.

### Innovation and technology

Digital transformation and continuous innovation to make processes more efficient and sustainable.

### Ethics and governance

Strong, transparent relationships built on trust and shared responsibility.

**We turn every challenge into an opportunity to build a safer, more efficient, and sustainable future.**
